

Web Developer Intern - Angular/JavaScript/Java (m/f)

We need you, to develop and create with us the next generation of recycling technology and deploy it, worldwide!

Our mission is to promote a sustainable, efficient and fully-digital recycling sector – with our online recycling platform. It enables companies and recyclers to easily organize, track and then review recycling services online using real-time data and analytics. It consists of an app, connection to devices like smart bins and sensors, the backend, as well as integration to recycler systems. And we've got big visions... We want to integrate predictive algorithms and blockchain technology too!

Our software enables easier, more efficient recycling operations that save time, effort and cost while also generating better data to boost sustainability. We were founded in 2015 by a young team of entrepreneurs and are working with some of Europe's largest recycling companies. We were representatives of Germany at the European Venture Competition in 2016 and are funded by Climate KIC - an initiative of the European Union.

Are you ready to make a difference?

What to expect

- Great conditions, friendly-team, after-work events, unlimited vacation policy, a great office (amazing coffee!)
- Join our growing development team, in the startup hub of Hamburg – Mindspace (you'll love it)
- High responsibility and trust, developing, testing, and deploying new features end-to-end
- Shape our product in an early stage and do good for the environment
- Develop iOS, Android, and web apps
- up to 24,000€ with option for shares depending on your experience

What you need to bring

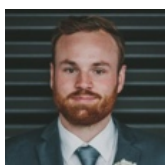

- Passion in software engineering
- Analytical and learning skills
- A get-shit-done attitude
- Fluent in English. German helps too.
- Sense of humor (don't worry – we've got one too)

It would be cool if you had experience with our stack

- Backend: Java / Spring / Hibernate / MySQL / Tomcat
- Frontend: JavaScript / AngularJS / Ionic
- API's: JSON / REST / HTTPS
- Infrastructure: AWS, Docker, Git

Interested?

Lets talk business. Please send a short message, include your CV, availability, and ideally some code (GitHub profile).
